

Argo CD and Rollouts User Survey – Spring 2021

The Argo CD and Rollouts Spring survey of 2021 ran for two weeks, from Feb 8 to Feb 22 and had a total of 66 respondents.

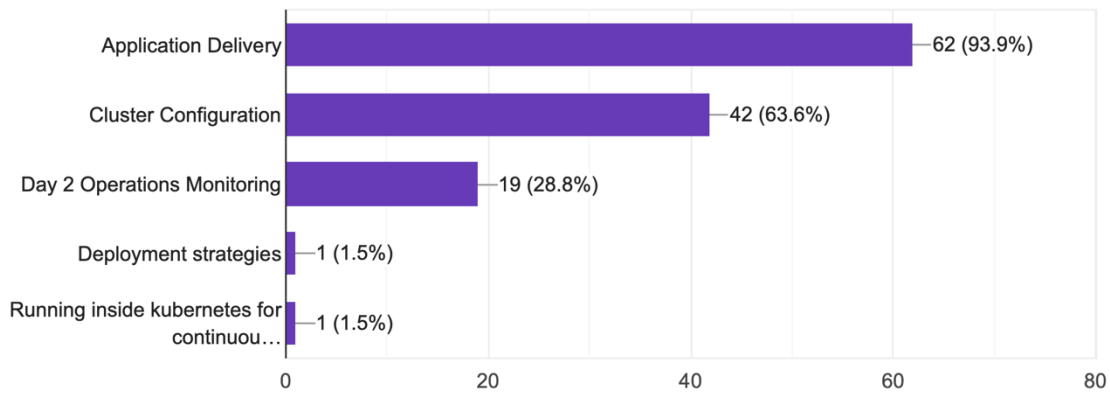

The total number of answers on individual questions might differ from 66, due to some being multiple choice and not all respondents answering every question.

The raw data is presented below.

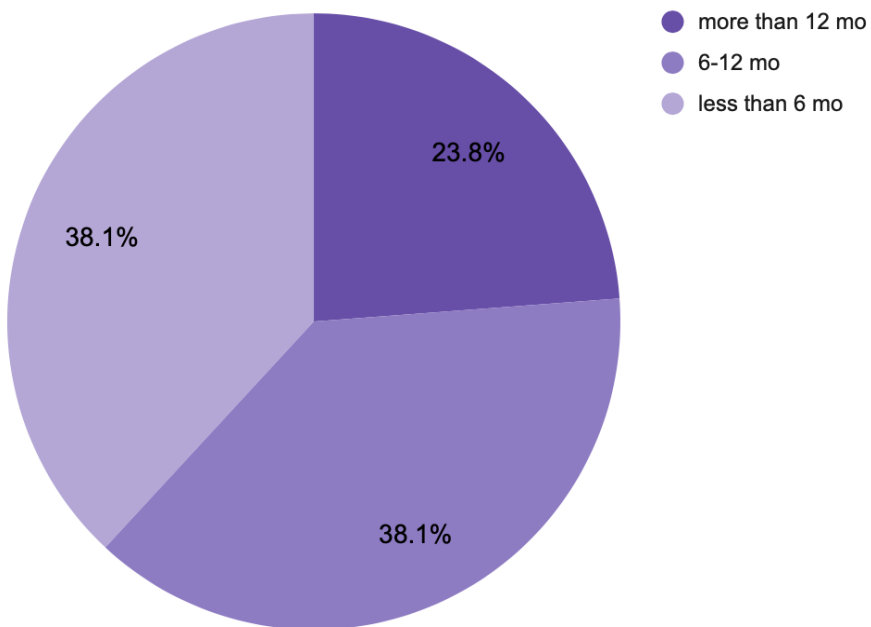

What's your job role?

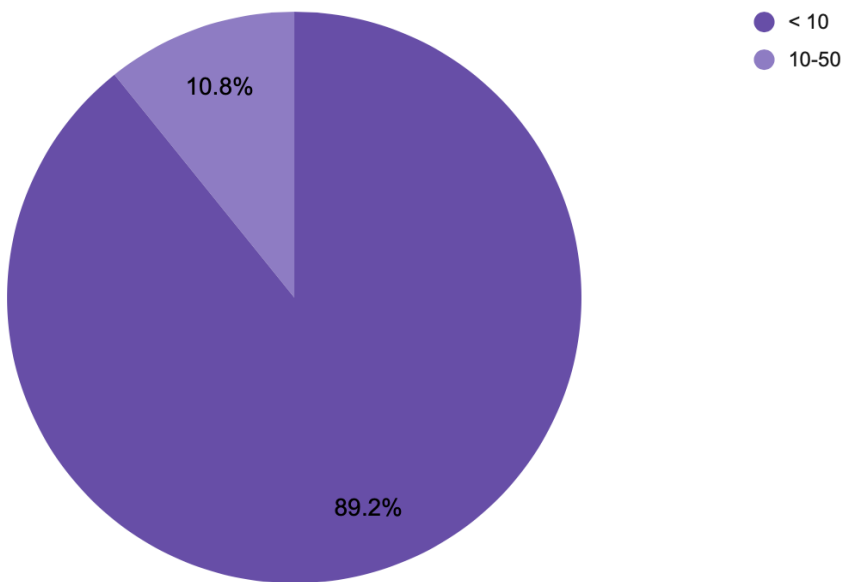

What are your use cases for Argo CD?

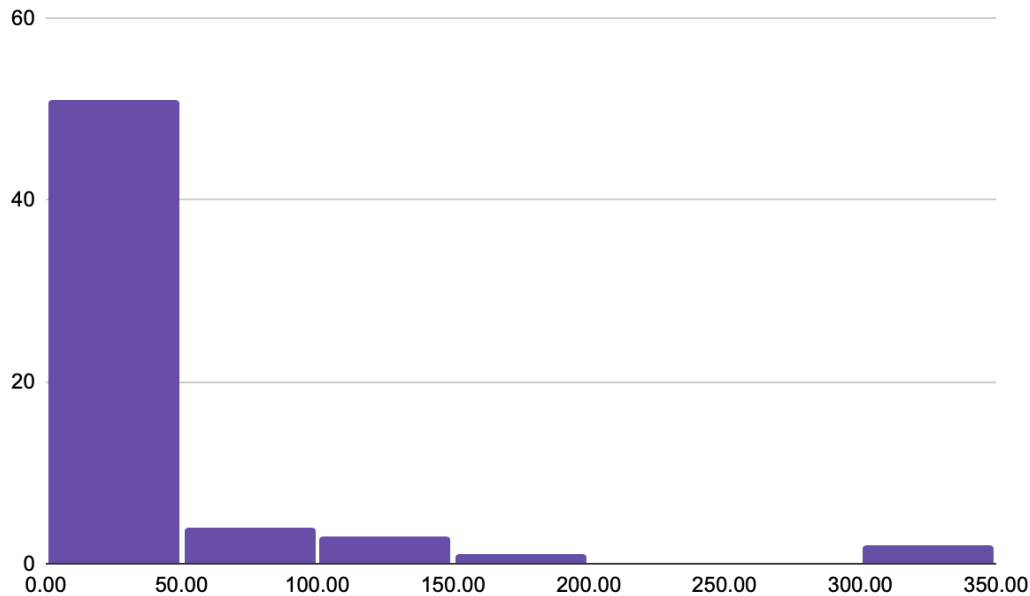

How long have you been in production with Argo CD?

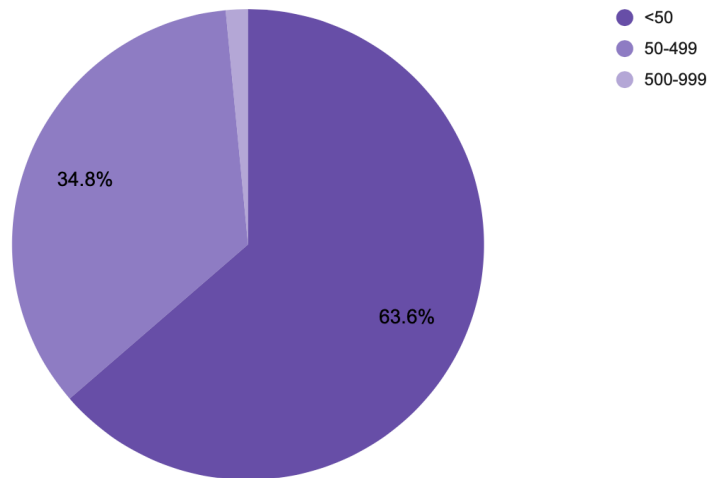

How many clusters do you have in production with Argo?

What's the average number of nodes in your clusters?

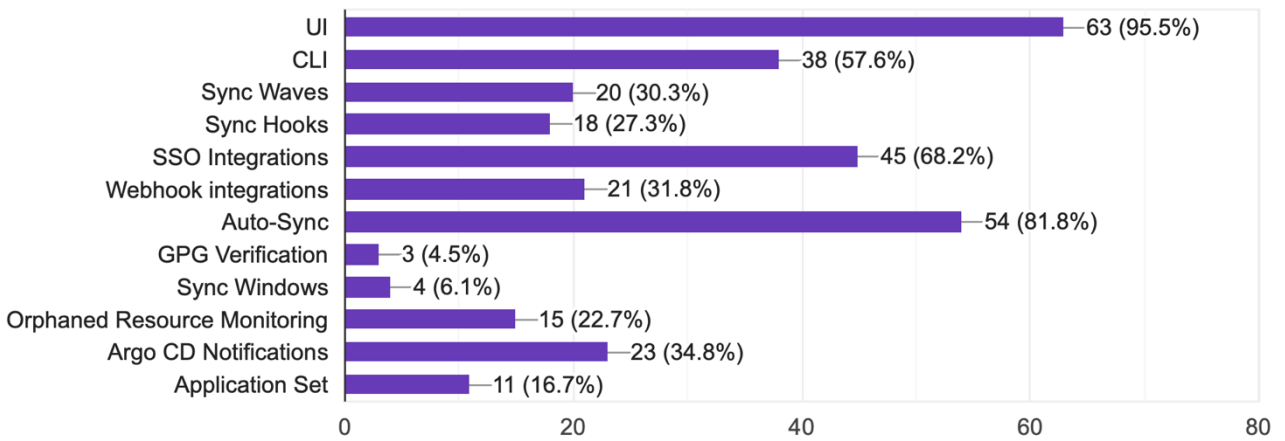

How many Argo CD applications do you have?

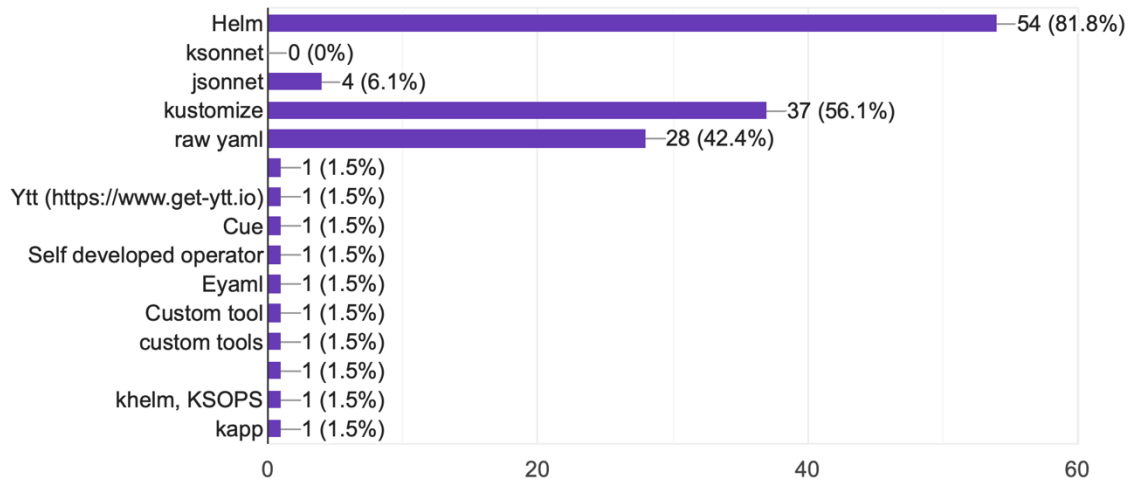

If you're not yet in production, what is currently preventing you from going live?

- *Clear patterns for managing env specific configurations and multiple clusters in a maintainable fashion.*
- *Completion of production readiness review*
- *Experimentation of devops*
- *Internal process maturity*
- *Just starting out*
- *Need time to inspect and experiments more. Also, we need to train other members.*
- *right now we are in the building stage and once our solution is in prod, we will delivery software onto our customers onprem kubernetes clusters via ArgoCD and we will be doing it for 100's of our customers*
- *slow changes/innovations in company*
- *Stakeholder buyout, still exploring the use case*
- *We are yet to complete work for our first application*
- *We didn't finished the Flux v1 to ArgoCD migration yet*

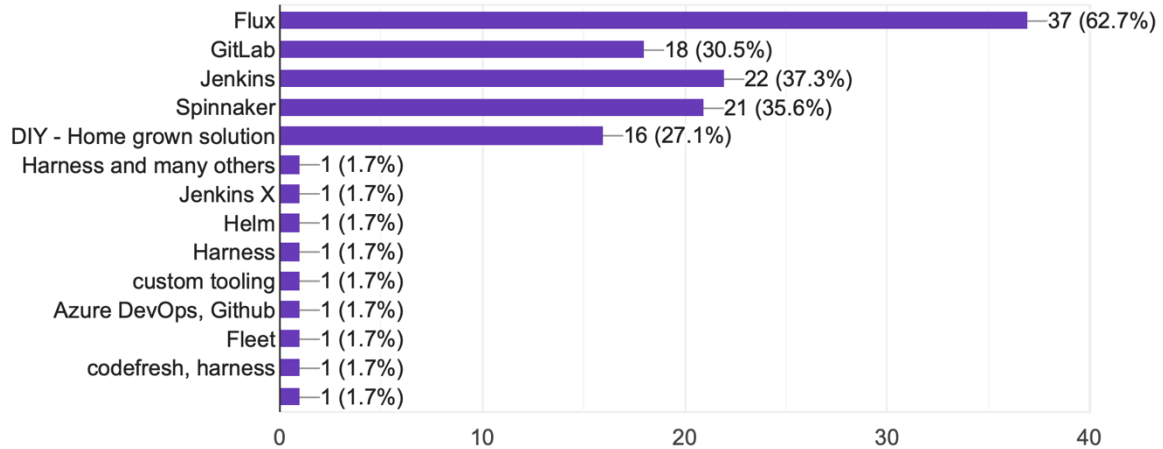

What features do you currently use?

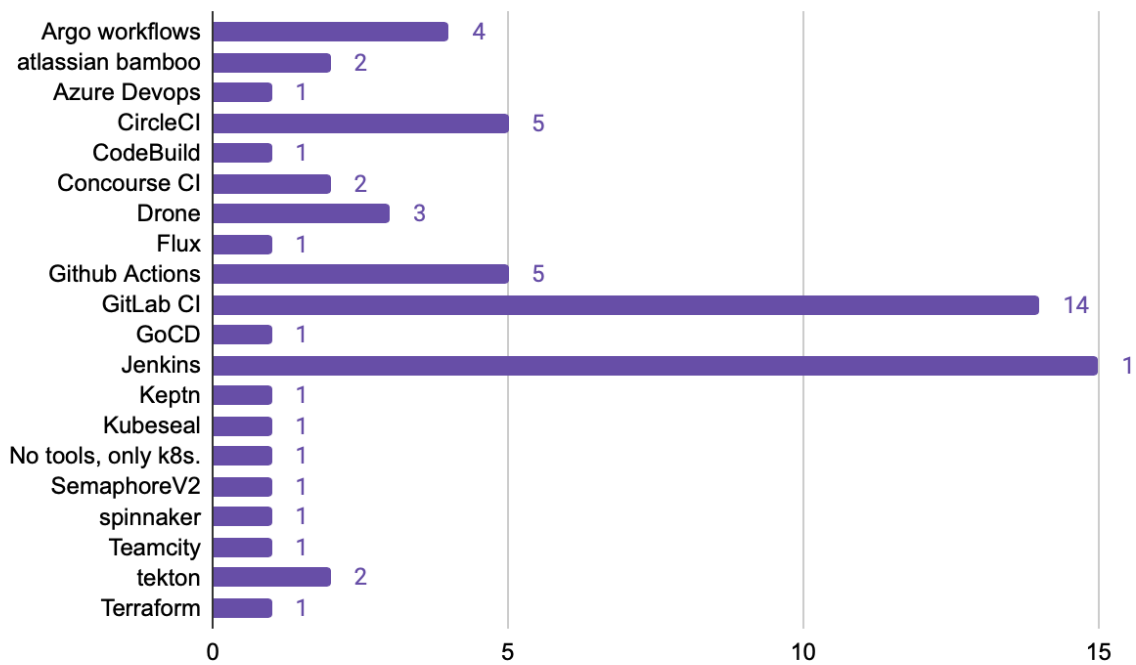

What tools do you use for Configuration Management?

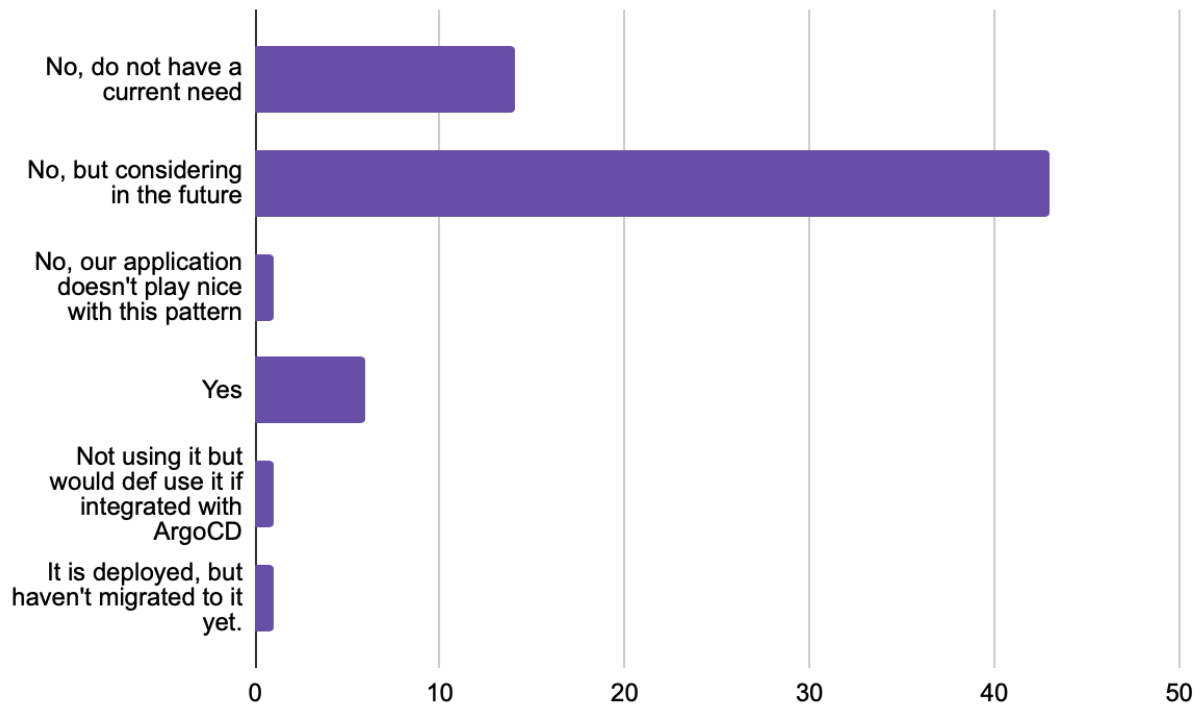

What other products did you evaluate before choosing Argo CD?

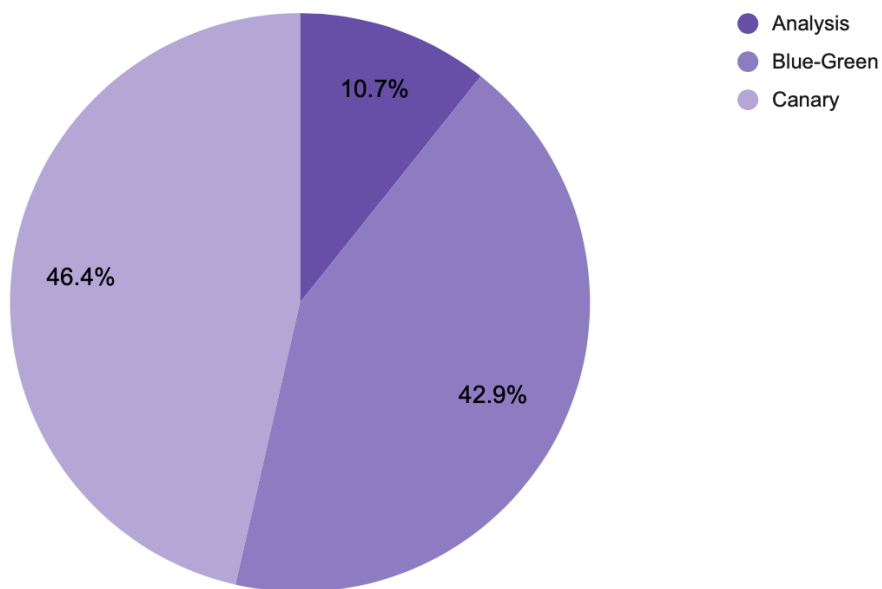

What other tools are you using with Argo CD (e.g. Jenkins)

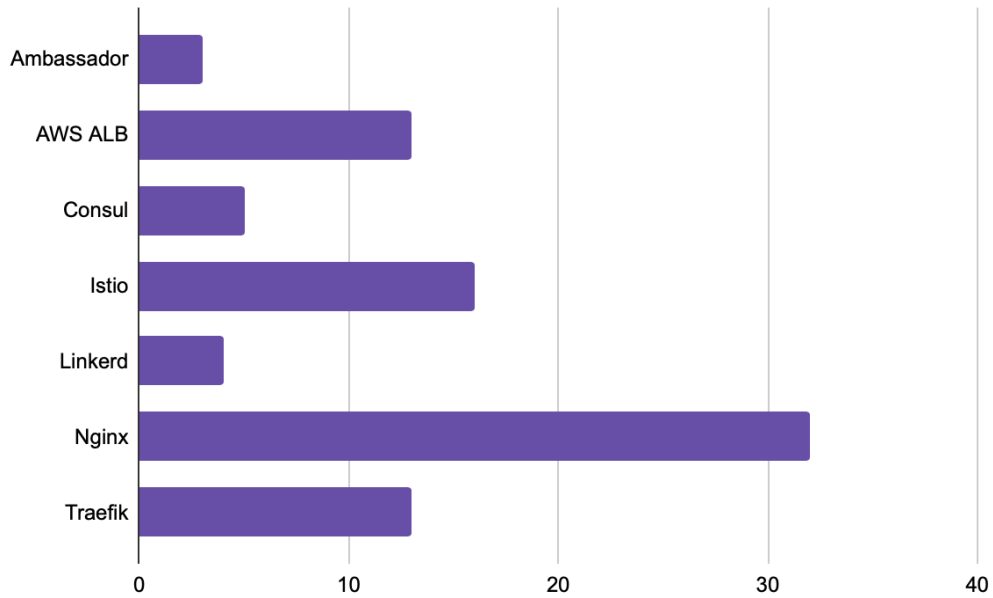

Are you currently using Argo Rollouts?

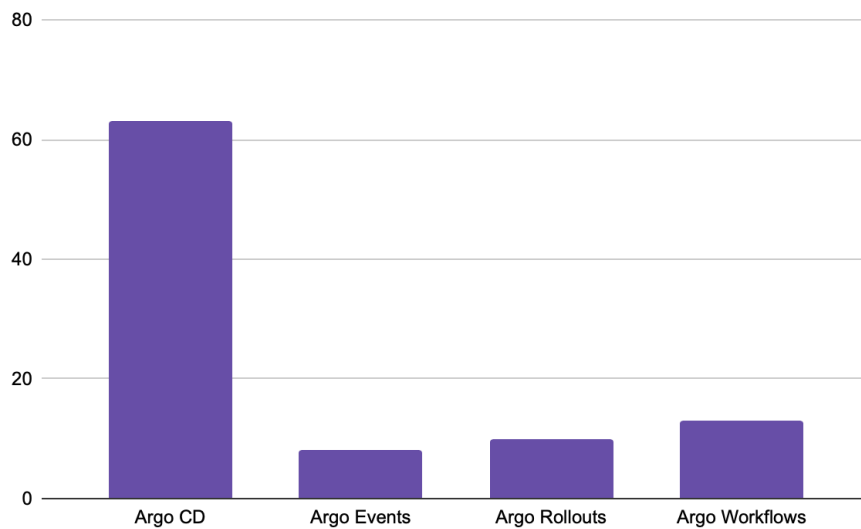

If using Rollouts, what features are you using?

What Ingress/Mesh Technologies do you use?

What Components are you using from the Argo Family?

Would you be willing to engage with the community in any way?
